

# Couple de serrage

## Coppia di serraggio

Les couples de serrage ci-dessous sont préconisés pour les vis des plaquettes.

Nous recommandons de ne pas utiliser de dégrissant (tel que pâte, graisse...) pour les vis.

Di seguito indichiamo alcuni valori delle coppie di serraggio. Noi consigliamo di non usare paste antigrippaggio sulle viti.

Vous trouverez les clés dynamométrique dans le chapitre accessoires.

Per i cacciaviti Torx consultare il capitolo per gli accessori aggiuntivi.
